

Exercise Neuroscience Group Meeting 2017

June 15 – 16 | University of Guelph, Ontario

ENG offers an exciting opportunity to present proposals, preliminary data, or completed studies in an informal setting with other students and faculty from laboratories focused broadly in the area of exercise neuroscience

Welcome to the University of Guelph and the Exercise Neuroscience Group 2017 Meeting

June 15, 2017

To all 2017 ENG meeting Participants:

Welcome to the University of Guelph and the 2017 Exercise Neuroscience Meeting. Held biennially, this meeting brings together faculty and trainees from several disciplines across Canada who share an overarching interest in the field of exercise neuroscience. The aim of this meeting has always been to provide trainees the opportunity to present research proposals, preliminary data or completed works in an informal and supportive academic environment. ENG is also a great opportunity to network and catch-up with friends and colleagues.

Over our two day program we will see presentations from trainees ranging from undergraduate students to postdoctoral fellows. A unique aspect of ENG is the depth and breadth of research our members bring to the field of exercise neuroscience, spanning from sensory to motor output and everything in between. This is truly a special meeting and more than a scientific conference, ENG is a reunion for those sharing a common passion which transfers to the next generation of young scientists. Thank you to all presenters, attendees and volunteers for your participation and for helping make the 2017 ENG meeting a success. A special thanks to those of you who have travelled from afar. Finally we would like to thank all of our sponsors for their generous financial contributions to the meeting.

Cheers,

Two handwritten signatures in blue ink. The first signature is for Geoff Power and the second is for Leah Bent.
